SUMMARY

Java Full Stack Developer with hands-on internship experience in developing web applications using Java, Spring Boot, Spring Security, React.js, and MySQL. Skilled in building RESTful APIs, implementing JWT-based authentication, and developing responsive user interfaces. Currently pursuing a B.Tech in Computer Science and passionate about building scalable, secure, and high-performance web applications while continuously learning modern software development technologies.

EDUCATION

B.Tech in Computer Science

July 2025 - Present | India

JP Institute of Engineering & Technology, Meerut (AKTU)

Meerut

- Pursuing

Diploma in Computer Science & Engineering

Sep 2021 - July 2024 | India

Chhatrapati Shahuji Maharaj Government Polytechnic College

Ambedkar Nagar

- Passed

Intermediate

Jun 2020 - July 2021 | India

Sri Shankar Ji I.C. Katwa Gahaji Azamgarh

Uttar Pradesh

- Passed

INTERNSHIP

Java Backend Development Intern

Variable Software Pvt. Ltd., Noida

Oct 2024 - July 2025 | India

- Developed backend applications using Java, Spring Boot, and Spring Framework.
- Built and integrated RESTful APIs with MySQL using JDBC, JPA, and Hibernate.
- Applied OOP principles and implemented CRUD operations with clean, maintainable code.
- Worked with Git/GitHub in an Agile development environment.
- Tested, debugged, and optimized backend applications for performance and reliability.

SKILLS

Frontend: HTML5 | CSS3 | JavaScript | Tailwind CSS | Bootstrap 5 | React.js

Backend: Core Java | Advanced Java | Spring Framework | Spring Boot | Spring Data JPA | Hibernate ORM | Spring Security | REST APIs | JDBC | JWT Authentication

Database: MySQL

Tools & IDEs: Git | GitHub | VS Code | Eclipse | IntelliJ IDEA | Postman | Maven

Concepts: OOP | Collections | Exception Handling | Multithreading | Design Patterns | REST APIs

PROJECTS

Authentication System (JWT Based)

Tools: IntelliJ IDEA

Technologies: Spring Boot, Spring Security, JWT, React.js, TypeScript, MySQL, JPA/Hibernate

- Developed a secure authentication system using Spring Boot and React.js (TypeScript).
- Implemented User Registration and User Login using JWT-based authentication.
- Configured Spring Security to secure REST APIs and authenticate users.
- Implemented USER role authorization for protected endpoints.
- Integrated **MySQL** with **Spring Data JPA (Hibernate)** for user data management.
- Secured passwords using **BCrypt Password Encoder**.
- Built a responsive frontend with **React.js**, **TypeScript**, and API integration.
